

Econo-Skin

Tabletop Skin Packaging Machine

Features

- Low initial cost
- Compact/portable bench-top unit
- Energy efficient instant on/off heaters
- Timer controlled repeatability
- Self-contained, requires only electrical connection (no compressed air required)
- Latest safety features

Operation

The operator places the master card onto the machine bed, loads product and presses the two-hand start buttons to initiate the skin cycle. The heaters turn on, heating the film in the clamp frames; (heat time is controlled via an adjustable timer). At the end of the heating cycle, the clamp frame lowers over the card as the timer-controlled vacuum is

initiated. The heaters remain on for a seal dwell time and then turn off. The cooling cycle takes place, and the package is finished. The operator opens the clamp frame, moves the finished skin packed card out of the form area and film is simultaneously reloaded in the clamp frame. The cycle may then be repeated.

Specifications

Skin card size	18" x 24" maximum	Part height	8" maximum
Cycle times	15 – 60 seconds typical	Vacuum	Self-contained
Air	None required	Electrical	220V, 1 PH, 50 Amps
Size	32"W x 23"L x 31"H approx.	Weight	250 lbs. approx.

Customer Benefits

Start up assistance

Upon completion, the entire blister packaging system is prepared for production conditions, and customer personnel are completely trained at our facility. After approval, the system is shipped to customer's location. ZED technicians are available to provide on-site support.

Tooling

ZED Industries has complete state-of-the-art tooling facilities to provide laser-cut maple seal tools and CNC-machined aluminum seal tools, face plates and hoppers.

After-sale support

ZED Industries' fully qualified field service technicians provide unmatched field support for all of its packaging systems. In-house machine-, tooling-, and control systems engineers provide professional assistance via telephone or modem.

Marketing support

ZED Industries offers complete sales, marketing, engineering, and technical services to assist its customers at all levels of product development, machinery selection, materials and sampling to help bring products and packaging from concept to reality.

With over 50 years of experience, Zed Industries is the leading manufacturer of thermoforming and plastic packaging equipment including heat sealers for carded blister packs and clamshells, skin packers, die cutters, form/fill/seal equipment, thermoformers and custom engineered packaging systems.
