

Model EZB

Table Top Blister Sealer

Features

- Available Seal Area: 10" x 10"
- Seals parts up to 2- ½" deep
- Simple Operation
- Low Maintenance

Description

The Zed Model EZB is a table top, single shuttle heat sealer with automatic cycle. The large 10" x 10" temperature controlled seal platen with 700 Lb time controlled seal, makes it ideal for production runs.

Tooling can be made from maple board, aluminum and phenolic, with changeovers made in seconds. Materials such as blister cards, aluminum foils, Tyvek, thin plastic lid stock and clam shell blisters may be sealed. Typical application for this machine are blister packs, food trays, unit portion packs, fold-over cards, pharmaceutical, hospital supply items and special seal applications.
