

EZ-Skin/Trim Combo

Complete skin packaging and die-cutting system

Features

- Space-saving, single-frame design
- Instant on/off heaters
- Hydraulic die cutting
- Work/motion efficiency
- Timer controlled repeatability
- Requires only electrical connection

The ZED Advantage

- Innovative technology
- Superior features
- Heavy duty design
- Excellent quality
- World-class performance
- Customized options
- Support and service

Description

The Zed EZ-Skin/Trim Combo represents a new concept in skin packaging with 18" x 24" master skin cards because it combines the advantages of hydraulic die cutting with an easy to operate skin packer – both mounted to a single, space-saving frame. This new, cost-efficient system allows for maximum productivity of high quality skin package items by a single operator! Time that was formerly wasted (waiting for the film to heat) can now be used for die cutting and pack-off into shipping cartons, case packing, etc. This economically priced, completely self-contained machine requires only electrical supply for full operation.

Operation

The operator places the master skin card onto the bed of the Zed EZ-Skin/Trim Combo and...

- Loads product, depresses the two-hand start buttons to initiate the timer controlled automatic skin cycle, and...
- Slides the skin packed card from the skin station to the die shuttle (Optional cut-off slits film automatically)...
- Lowers the die (which is mounted to a pivoting arm assembly) and slides the shuttle into the timer-controlled hydraulic trimmer, and...
- Repeats the loading/heat sequence, slides the shuttle out of the press, opens the die, and removes the finished die cut individual packages from the shuttle for packing into shipping cartons.

Specifications

Model	EZ Skin/Trim Combo
Maximum skin card size:	18" x 24" / 460 x 610 mm
Maximum part height:	3" / 76 mm
Dimensions (LxWxH)	10'x2.5'x5' / 3050x760x1525 mm
Speed (cycles/minute)	½ - 2 / min*

*depending on application, product to be packaged, #-up, card & film material type, tooling, etc.

All listed specifications are approximate; final "as built" specifications depend on customer requirements. Other sizes and custom systems available on request.

Customer Benefits

Start up assistance

Upon completion, the entire blister packaging system is prepared for production conditions, and customer personnel are completely trained at our facility. After approval, the system is shipped to customer's location. ZED technicians are available to provide on-site support.

Tooling

ZED Industries has complete state-of-the-art tooling facilities to provide laser-cut maple seal tools and CNC-machined aluminum seal tools, face plates and hoppers.

After-sale support

ZED Industries' fully qualified field service technicians provide unmatched field support for all of its packaging systems. In-house machine-, tooling-, and control systems engineers provide professional assistance via telephone or modem.

Marketing support

ZED Industries offers complete sales, marketing, engineering, and technical services to assist its customers at all levels of product development, machinery selection, materials and sampling to help bring products and packaging from concept to reality.

With over 50 years of experience, Zed Industries is the leading manufacturer of thermoforming and plastic packaging equipment including heat sealers for carded blister packs and clamshells, skin packers, die cutters, form/fill/seal equipment, thermoformers and custom engineered packaging systems.
