

Model L, L-1 and G

General Purpose Laboratory Thermoformers

Optional Features:

- Automatic timer control
- Production heater – 220 Volt
- Air operated platen
- Roll around stand

The ZED Advantage

- Innovative technology
- Superior features
- Heavy duty design
- Excellent quality
- World-class performance
- Customized options
- Support and service

Features

All three thermoformer models feature roll-fed thermoplastic materials, up-moving platens and adjustable heater height for increased flexibility, and are ideally suited for sampling blisters, prototypes and laboratory work. The Models L-1 and G can be used for short or long run production and prototyping. These units are available with large form areas and require only three phase electric power and compressed air. The Zed Model L is a self-contained thermoformer requiring connection to 110 volt electric only for full operation. The up-moving platen and heater height are adjustable for increased flexibility. The standard machine is ideally suited for sampling blisters, prototypes and laboratory work.

Customer Benefits

Start up assistance

Upon completion, the entire blister packaging system is prepared for production conditions, and customer personnel are completely trained at our facility. After approval, the system is shipped to customer's location. ZED technicians are available to provide on-site support.

Tooling

ZED Industries has complete state-of-the-art tooling facilities to provide laser-cut maple seal tools and CNC-machined aluminum seal tools, face plates and hoppers.

After-sale support

ZED Industries' fully qualified field service technicians provide unmatched field support for all of its packaging systems. In-house machine-, tooling-, and control systems engineers provide professional assistance via telephone or modem.

Marketing support

ZED Industries offers complete sales, marketing, engineering, and technical services to assist its customers at all levels of product development, machinery selection, materials and sampling to help bring products and packaging from concept to reality.

With over 50 years of experience, Zed Industries is the leading manufacturer of thermoforming and plastic packaging equipment including heat sealers for carded blister packs and clamshells, skin packers, die cutters, form/fill/seal equipment, thermoformers and custom engineered packaging systems.

Model L (tabletop)

Model L-1

	Forming Area	Machine Dimensions (Approximate)
Model L-1	20" x 20", 22" x 22"	32"W x 56"L x 60"H
Model G	25" x 30", 30" x 36"	40"W x 60"L x 48"H
Model L	14" x 15"	26"W x 40"L x 26"H
